

INSTRUCTIONS FOR GRICES' CONFIGURATOR

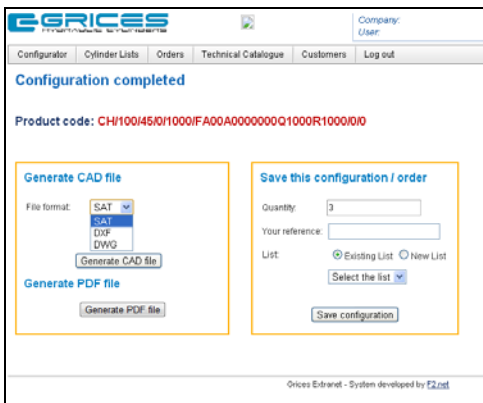

Insert the e-mail and password sent by Grices in the customer area

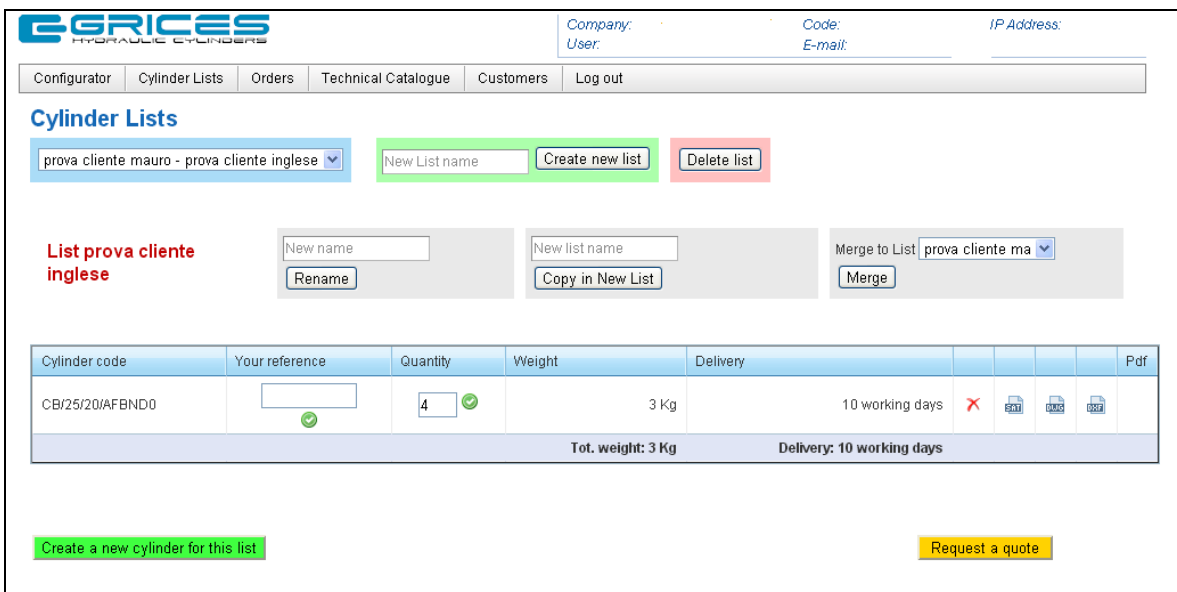

In the configurator menu it's possible to choose the cylinder series from Grices' selection

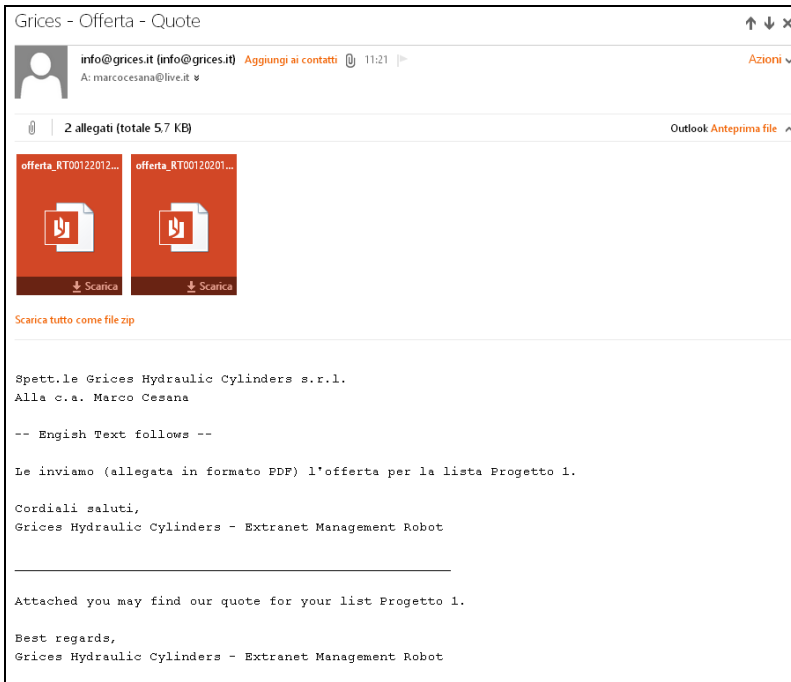

Step by step the client is guided in the creation of the cylinder code

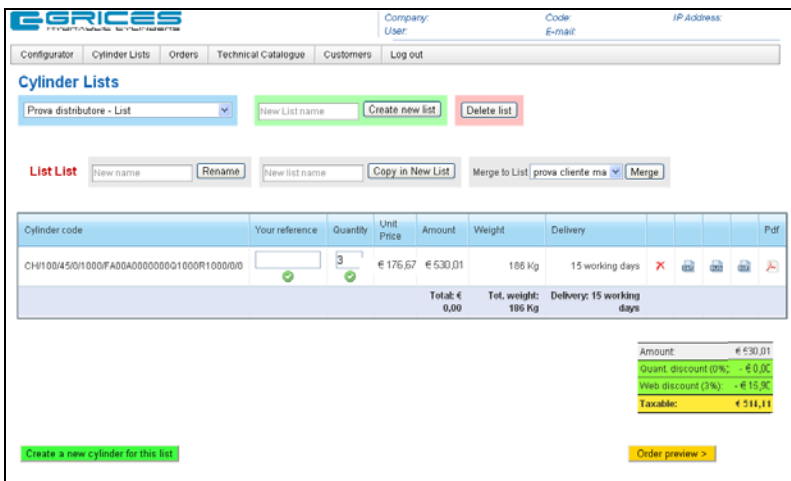

At completion, it is possible to generate the CAD file in the desired format and save it in a list relative to a project with code and quantity

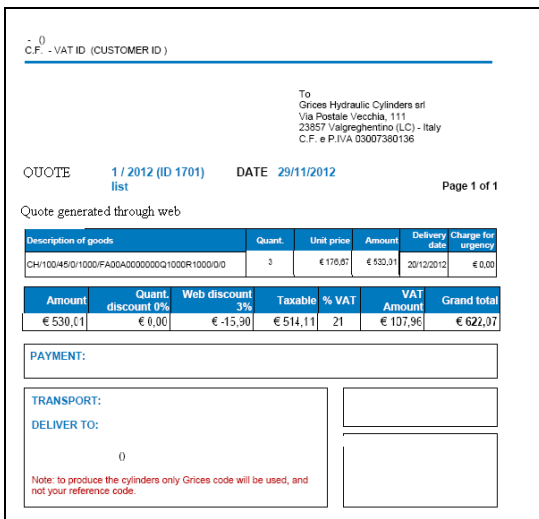

From the *cylinder lists* menu it is possible to create, change, merge, rename, delete your lists and to add or delete cylinders from those lists. By clicking **request a quote** the client can forward the quote request of the cylinder to our system

Our server will send automatically an e-mail to the client with the quote's details attached.

Once the quote is received the client can move forward with the order directly from the configurator

The received attachment contains details about the quote: price, delivery date, payment and transport method and web discount of 3% reserved to orders received from the configurator
